

Environmental and amenities improvement

A second part of the long-term project is to help improve the diet, hygiene, sanitation and clean water supply in negotiation with the communities – thus improving their basic quality of life and long term health.

Education and Spiritual Development

The third stage is to establish a school and discipleship training centre for the local area to help improve basic literacy, numeracy and other basic skill requirements.

Comment

‘For I was hungry and you gave me something to eat, I was thirsty and you gave me something to drink. I was a stranger and you invited me in, I needed clothe and you clothed me, I was sick and you looked after me, I was in prison and you came to visit me’... ‘I tell you the truth what ever you did for one of the least of these brothers of mine; you did for me [Matthew. 25: 35, 36, 40].

This challenge has come to us through the work of our partners in areas where many children have been made orphans, due to parents dying of AIDS.

Only by your support can this work be fulfilled.

If you are concerned for the physical and spiritual health of these people in these parts of Africa you can be a partner. Any donation to JML Christian Ministries Trust can be accepted. Or if you are interested in volunteering your services you can also contact us at the same address.

I Care Project

**A project caring for neglected
Orphans and youths in Africa.**

**Please help to put a smile on their
faces.**

Who are we?

JML International is a registered Charity giving practical support and encouragement to the poor and needy around the world whose lives are blighted by war, poverty and illness with little hope of improvement. Our main focus at present is in job.

The 'I Care' project' is run by JML Ministries which is a Christian Missionary organisation based in the UK and USA. For more details about other work that is done under the JML Ministries 'banner' please contact us on the addresses below.

The 'I Care' project is a project that is part of our international programme to help the poor and destitute in Africa and other parts of the world. However, unlike most (secular) aid agencies we consider it of utmost importance to develop the spiritual wellbeing of those we serve. This is on top of and part of our practical aid programme. This programme has many facets which are outlined below.

1. Hunger Related illness
2. Dietary Imbalance
3. Aids etc

Background Information

You may have seen, heard or read about the effects of HIV and Aids on the communities in Africa – where these diseases have struck most violently. The result is often the death of parents before that of the children – leaving many youngsters as orphans to the extent that is only paralleled during times of war. In fact we are facing a war in many parts of Africa. This war needs to be tackled at different levels:

1. Educating those at risk from within their communities how to prevent contracting the above.
2. Caring for the victims and teaching others to do so, often against locally held prejudices.
3. Improving the quality of life and life chances of those most at risk.
4. Attacking the spiritual causes through prayer and action in encouraging holy living.

In all these methods above we hope to manifest the love of Christ through our ministry.

Our Aims:

- To give the orphans and youths
- To help them in their daily lives
- To communicate and listen to their needs
- To help families and relatives to understand their needs
- To love them and give them support
- To prevent the increase in the spread of AIDS amongst the youth in the areas where we are working.

We already have partners who are working to improve the situation in West Africa and who are desperate for the smallest kind of help.

The Plateau Project

Health Care in the Community

This project will begin with a short term mobile clinics which will be used to visit the different villages and help the locals with primary medical and health care and through the dissemination of basic education on how to prevent illness through key figures in the communities.

The second stage is to build a long term Health Centre where a family can receive support as required. We will provide a loving home when life gets tough and will be able to assist medically and spiritually with trained staff. We already hand land that has been purchased for this purpose at a specific site.

The Ghana project

**Christian evangelism
Youth and Children ministries;
putting orphan children through primary and Secondary
Education**
